VALEDICTORY.

In July, 1940, Mr. S. Bennett, F.I.A., relinquished his post as Government Statistician after some 23 years' service in that capacity.

Appreciative references have been made to Mr. Bennett's work by his fellow Statisticians throughout the Commonwealth, and tribute is paid by the staff of this Office to his fine qualities as "chief" and colleague.

ACKNOWLEDGMENT.

The assistance of members of the public, Government officers, and others who have supplied any information needed for compiling the matter set out in the following pages, is gratefully acknowledged. I also express appreciation of the valuable co-operation of the Commonwealth Statistician and his staff.

I am especially indebted to Mr. C. R. Muirson, Chief Compiler, for his able assistance in supervising the compilation of the various parts of the "Statistical Register," and to those officers who had charge of sections of the tabulation.

My thanks are also due to members of the staff, who, through the difficult days since the outbreak of war, have loyally responded to the call for increased effort rendered necessary by the absence of officers on active service.

R. J. LITTLE,
Acting Government Statistician.

No. 5.—Consolidated Revenue—Expenditure and Receipts CLASSIFIED ACCORDING TO FUNCTIONS, 1937-38 and 1938-39.

The general purport of this table is to show the net cost, including the relevant proportion of Public Debt service, of each *function* of Government, irrespective of the department or departments administering such functions. It should be noted that *Expenditure on Hospitals* is met mainly from the Hospital Trust Fund, into which is paid the proceeds of the Hospital Tax, which totalled £245,660 in 1937–38 and £264,072 in 1938-39. Expenditure on *Unemployment Relief* includes sustenance and payments of a like nature amounting to £51,966 in 1937–38 and £46,859 in 1938-39. Receipts shown for the item *Roads and Bridges* comprise interest and sinking fund paid by the Main Roads Board on loan capital advanced by the Treasurer in respect to certain Metropolitan roads. *Agricultural Bank* expenditure from Consolidated Revenue is confined to meeting Public Debt charges, the salaries of the Commissioners and certain group settlement administration. The receipts shown represent the Bank's contribution towards interest and sinking fund on loan capital advanced by the Treasurer. Receipts shown for the item *Navigation, Harbour and Lights* represent, largely, contributions by the Fremantle Harbour Trust on account of interest and sinking fund on loan capital, together with surplus profits. Expenditure from consolidated revenue in respect to the *Metropolitan Market Trust*, the *Workers' Homes Board* and *Trading Concerns* covers only Public Debt Charges, and receipts shown represent amounts paid to revenue on account of such charges, current or accrued.

WESTERN AUSTRALIAN TRADE.

Twelve months ended 30th June, 1939.

(Figures in parentheses are those for the corresponding period of 1937–38.)

TOTAL TRADE.

£42,400,576 (£44,033,136) Australian Currency.

Although the State's external trade during the period under review was approximately £1½ millions lower than that of the previous year, owing mainly to a substantial decrease in imports, the figure £42,400,576 is still some five million pounds in excess of the pre-depression year's peak of 1928–29.

The trend of Western Australia's trade since 1930 is illustrated by the following index, which is based on the average annual value of trade for the three years 1927–28 to 1929–30 (exclusive of gold exported in excess of current production) :—

	Imports.	Exports.	Total.
1927–28 to 1929–30 ...	100	100	100
1930–31	60	80	69
1931–32	60	91	74
1932–33	69	92	80
1933–34	72	103	87
1934–35	80	100	89
1935–36	91	113	101
1936–37	102	125	113
1937–38	110	138	123
1938–39	102	137	118

The Trade Position.

Inclusive of Ships' Stores and exchange on Oversea Imports, the following table shows the "visible balance of trade" for the last five years :—

	Favourable. £
1934–35	1,464,563
1935–36	1,511,297
1936–37	1,548,383
1937–38	2,167,938
1938–39	3,612,244

Imports.

The "recorded" value* of all imports was £18,048,238 (£19,334,013). Goods purchased from the other States of the Commonwealth, valued at £12,664,528, and those from Oversea at £5,383,710, represented a decrease of £275,143 and £1,009,840 respectively.

The more important increases were as follows :—Milk (Dried), £45,047 ; Confectionery, £19,049 ; Live Animals (Sheep), £33,446 ; Wearing Apparel, £60,609 ; Residual Oil, £43,696 ; Iron and Steel (Bar, Rod, etc.), £25,795 ; Iron and Steel (Plate and Sheet—Galvanized), £46,986 ; Other Plate and Sheet, £21,424 ; Stationery, £26,422 ; Cyanides of Potassium and Sodium, £51,367 ; Drugs and Medicinal Preparations, £20,207 ; Rock Phosphates, £19,268 ; Sulphur, £45,894 ; and Arms, Ammunition and Explosives, £100,250. With the exception of Dried Fruits, £11,524, and Bags and Sacks, £11,214, other increases were of minor importance.

Substantial decreases were recorded in respect of Textiles, £134,809 ; Agricultural Machinery, £77,769 ; other Machinery, £720,380 ; and Motor Cars, £186,456. Other noteworthy decreases were as follows :—Butter, £24,259 ; Ale and Beer, £30,052 ; Cigarettes, £46,151 ; Lubricating Oil, £21,238 ; Petrol, Petroleum Spirit, etc., £41,607 ; Coal, £19,713 ; Iron and Steel (Plate and Sheet—Tinned), £14,902 ; Iron and Steel (Structural), £14,109 ; Tyres (Pneumatic), £36,457 ; Timber, £14,221.

Exports.

Despite the severity of the decline in wheat prices, total exports, which amounted to £23,006,410, fell short of the record figure of £23,100,537, established during the previous year, by less than one per cent.

While shipments overseas (inclusive of Ships' Stores) decreased from £20,014,725 to £17,566,632, Interstate Exports advanced £2,353,966 in value to attain a new peak level of £5,439,778. Of this increase, £341,579 was attributable to Merchandise and Ships' Stores, the balance, representing increased transfers of gold.

---

* Imports from Abroad are recorded in British Currency, whilst all other values are recorded in terms of Australian Currency.

Gold.—Valued at £10,709,875, gold shipments advanced £1,369,715 on the total for the previous year, and at this level represented approximately 47 per cent. of the value of all exports.

Direct oversea exports amounted to £7,351,292 (£8,008,170), while those shipped to the Eastern States totalled £3,358,583 (£1,346,195).

Primary Produce.—As a result of the continuation of the downward trend in export prices, which became markedly apparent during the latter half of the previous year, returns to primary producers were generally below those of 1937–38, despite the increased volume of produce available for shipment.

Wheat.—With values averaging 2s. 8·13d. per bushel f.o.b., as against 4s. 4·64d. for 1937–38, and shipments amounting to 22,613,525 bushels compared with 22,038,207 bushels, the value of wheat exports declined by £1,805,963 to £3,027,703.

Owing to the reluctance of growers to dispose of stocks at prices current during the year, the heavy carry-over of the previous season was further increased at the end of the year.

Wool.—Improved seasonal conditions and the clearance of portion of the clip carried over from the previous year were together responsible for the substantial increase in the value of wool shipments. Greasy Wool advanced 14,956,831lbs. from last year's export of 53,451,966lbs., but as a result of the decline in value—which fell from an average of 13·4d. per lb. in 1937–38 to 10·7d. per lb. during 1938–39—returns at £3,035,899 showed an appreciation of only £97,328.

Shipments to the United Kingdom, Belgium, and France increased 9,115,532lbs., 5,098,618lbs., and 3,311,611lbs. respectively, but decreases were recorded in exports to Germany and Italy.

Increases in quantity and value amounting to 900,138lbs. and £11,712 respectively were recorded in respect of exports of Scoured Wool.

Flour.—Exports of this commodity decreased £220,309 in value, although shipments amounted to 158,187 centals more than those of the preceding year.

Increased purchases were made by the Netherlands East Indies and Sudan. These, together with shipments to China, which had not been a buyer during 1937–38, more than offset decreases in shipments to the United Kingdom and British Malaya.

Apples and other Fresh Fruit.—Favourable growing conditions were reflected in substantially increased consignments of apples and other fresh fruit.

The former advanced 303,480 centals on the previous year's total to return £503,492—an increase in value of £287,141—while exports of other fresh fruit, totalling 89,419 centals, valued at £145,500, represented increases of 23,934 centals and £33,708 respectively.

Timber.—Compared with the figures for 1937–38, timber shipments, which were valued at £721,941, declined by £210,453.

Exports to the Eastern States remained approximately at the level of the previous year. The decline in exports to all destinations was mainly due to decreased purchases by the United Kingdom, South African Union, Egypt, and Iraq, and the absence of enquiries from China.

Other Commodities.—Increases in quantity and value were recorded in respect of Beef, 5,056,619lbs., £91,317 ; Mutton and Lamb, 3,070,021lbs., £84,173 ; Pork, 455,322lbs., £13,777 ; Currants, 1,757,788lbs., £24,601 ; Potatoes, 195,929 cwt., £117,494 ; and Sandalwood, 7,182 cwt., £11,687.

Although butter exports advanced 514,459lbs. in quantity, price recession resulted in a decrease in returns of £4,690.

Other of the more important decreases were as follows :—Cattle Hides, £13,076 ; Furred Skins, £22,133 ; Sheep Skins, £87,630 ; and Pearls and Pearlshell, £62,332.

PART IV.—INTERCHANGE.

1.—TRADE AND CUSTOMS FOR THE YEAR 1938-39.

It should be noted in the tables dealing with Trade, which follow, that Imports from Abroad are recorded in terms of British Currency, whilst all other values are expressed in terms of Australian Currency, except in Table No. 2, wherein all values have been estimated in terms of Australian currency. On page 160 a Special Summary Table (No. 9) shows the Estimated Balance of Trade after all values have been reduced to approximate terms of Australian Currency, and allowance made for Gold in excess of current production shipped abroad.

No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1939.

NOTE A.—On all Imports 10 per cent. has been added to the F.O.B. value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

TRADE CLASSIFICATION.

Owing to the grouping of the Import Items into Classes, in lieu of the alphabetical system followed prior to 1918–19 by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed index of the items in alphabetical order.

No. 35.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board, and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred.

VI.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market" (*e.g.*, Wheat is valued on an F.O.B. basis; Wool at the price ruling at Local Sales). In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."

(*b*) *Marketing Costs*, which are deducted from "Gross Value" to obtain "Local Value," comprise Freight, Cost of Containers, Commission, and other handling charges.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, certain depreciation, repairs, and similar costs, and is deducted from "Local Value" to obtain "Net Value."

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) after deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, and producer's own income.

II. MANUFACTURING.

The initial value taken is that of Output "at factory door." The *Net Value of Manufacturing*, comparable with the net value of primary production, is computed by deducting from output value the value of "goods consumed in process of production," viz.: materials used; power, fuel and light; containers, packing, etc. In other words, it represents the sum available to the manufacturer for payment of wages, rent, interest, depreciation, certain overhead expenses (such as advertising and insurance), and for his own income.

III. GENERAL.

(*a*) To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes costs of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."* The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933–34 at place of production before any marketing costs were incurred. Commencing with 1933–34, however, marketing costs, together with cost of goods consumed in process of production, have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.

(*b*) As a proportion of *all* production, *recorded* production varies somewhat from year to year. On the average, total net recorded production represents slightly more than half of the net value of all goods and services produced in Western Australia.

VIII.—MIXED FARMING—SEASON 1935-36.

Wheat in relation to Sheep, Dairy Cows and Pigs.

The following tables, Nos. 57, 58 and 59, prepared in collaboration with the Commonwealth Bureau of Statistics, are intended to show the extent to which Sheep and Pig-Raising and Dairying are carried on in this State in conjunction with Wheat Growing.

The special divisions used for these tables have been determined principally on Rainfall and Soil characteristics and comprise the following Statistical districts:—

Division I.—Harvey, Plantagenet, Albany, Marradong, Williams, West Arthur, Upper Blackwood, Kojonup, Cranbrook.
Division II.—York, Beverley, Wandering, Brookton, Pingelly, Cuballing, Wickepin, Narrogin, Wagin, Woodanilling, Katanning, Broomehill, Tambellup, Gnowangerup.
Division III.—Quairading, Bruce Rock, Narembeen, Corrigin, Kondinin, Kulin, Dumbleyung, Lake Grace, Kent.
Division IV.—Yilgarn, Dundas, Esperance, Phillips River.
Division V.—Northampton, Upper Chapman, Geraldton, Greenough, Irwin, Victoria Plains, Dandarragan, Chittering.
Division VI.—Mingenew, Three Springs, Carnamah, Moora, Wongan-Ballidu, Dalwallinu.
Division VII.—Toodyay, Northam, Goomalling, Dowerin, Meckering, Wyalkatchem, Kellerberrin.
Division VIII.—Mullewa, Morawa, Perenjori.
Division IX.—Mt. Marshall, Koorda, Kununoppin-Trayning, Mukinbudin, Nungarin, Merredin, Westonia.

No. 10.—Mid-Monthly Employment in Western Australian Factories. (*a*)

Figures in this table have been computed to a new base and supersede those published prior to 1939.

The Annual Mean Employment for the year 1928–29 (19,799) has been taken as a base = 100. The index number fell to 94 for the year 1929–30, and to 69 for 1930–31. The lowest point (60) was reached during the month of August, 1931.

* It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories not previously included. This tends to exaggerate the degree of recovery.

(*a*) Excluding Working Proprietors.

(*b*) Indexes after June, 1939, are based on sample returns and are subject to revision.

PART XII.—RETAIL PRICES (INCLUDING HOUSING), WAGES, EMPLOYMENT, AND MISCELLANEOUS.

NOTE.—In this issue Part XII. (formerly "Miscellaneous" of the composite volume Parts XI. and XII. "Local Government and Miscellaneous") has been rearranged and expanded into four divisions with the addition of three new sections covering statistics of Retail Prices (including Housing), Wages, and Employment.

While the bulk of the matter contained in these sections has not previously been dealt with in the Statistical Register or any other of the publications issued by the Department, certain of the tables set out in the Employment section are not new to the Register, having appeared in a somewhat different sequence in previous volumes. Thus Tables 37 *to* 39, *dealing with the State Labour Bureau, have been transferred from the Miscellaneous section, and Table No.* 40—*Industrial and Trade Unions—from Section IV. of Part III.*—"*Accumulation.*"

It should be noted that particulars of Wholesale Prices are not given in this Part—for details of these the reader is referred to Part V. (Land Settlement, Agriculture, Live Stock and Meteorological Statistics).

I.—RETAIL PRICES (INCLUDING HOUSING).

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., Housing and House Rents (including data from the Census Records of 1921 and 1933), and Retail Price Index Numbers.

RETAIL PRICES.

Retail Prices of selected groups of commodities and services are collected regularly by the Government Statistician from representative informants in the more important towns of Western Australia.

From 14 towns, prices are obtained for regimens covering (*a*) 41 items of Food and Groceries, (*b*) Rents of 4 and 5-roomed Houses, (*c*) 81 items of Adult and Juvenile Clothing, and (*d*) 28 items of Household Drapery and Utensils, and in addition, various items of Miscellaneous Expenditure, such as Fuel and Light. (*See* also page 21.)

Prices of Food and Groceries only are collected from a more extensive list of towns. Informants are required to furnish prices monthly (prices as at the middle of the month) for Food and Groceries and quarterly (particulars as at the 15th of the middle month of each quarter) for House Rents, Clothing, and Miscellaneous items.

Specific grades and qualities have been established for the various items included in the regimen in order to ensure that all informants throughout the State shall quote consistently for articles of the same standard. The collection of data in the Metropolitan Area, Kalgoorlie-Boulder, Northam, Bunbury, and Geraldton—the "five towns" of Western Australia in the several Commonwealth retail price index series—is made under the authority of the Commonwealth Census and Statistics Act, 1905–1938. The State Statistical Department directly supervises the collection of data for the Commonwealth Statistician. The actual collection of returns is carried out by a specially qualified field officer of the Commonwealth Bureau of Census and Statistics, who is attached to the State Department. This officer checks prices and standards in the shops of informants, and inspects houses listed on the rent returns.

In those towns where returns are required under the State Statistics Act, 1907, the method of collection is substantially the same as that outlined above.

Food and Groceries.

The regimen of Food and Groceries commodities adopted for the several index series issued by the Australian Statisticians is set out in Table No. 1. This shows the average prices quoted by retailers in the Metropolitan Area during each month of 1939.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 2.—Consumption of Foodstuffs, Spirituous and Alcoholic Liquors, and Tobacco.

Details of the estimated annual consumption, per head of population, of some of the more important food commodities consumed in Western Australia are shown in the table hereunder. Particulars are also given of the consumption of Spirituous and Alcoholic Liquors and Tobacco and Tobacco Preparations.

The figures have been derived from records of production and trade for the years 1936–37 to 1938-39, and show the average amounts consumed annually per head of population during that period.

As these estimates represent the actual amount of each commodity used in Western Australia in the form specified, it should be kept in view, that to some extent, certain of the items contain duplications. Thus, in the case of flour, the quantity stated includes not only the amount used for household purposes, bread-making, and so on, but also the intake of Western Australian factories which use flour as a raw material. To the extent that this intake enters into local consumption in the form of another specified commodity such as biscuits, there is duplication as between the respective items. Other commodities similarly affected are sugar, butter, butter substitutes, currants, and raisins. On the other hand no adjustment has been made for intake by local factories where the final product did not go into consumption in Western Australia—as in the case of flour and butter used in manufacturing biscuits for export—nor for intake by factories outside the State which did enter into local consumption in the form of imported products, such as the sugar content in imported jams.

RETAIL PRICE INDEX NUMBERS.

In this section are shown Index numbers computed from retail prices returns furnished by informants in the more important towns of the State.

These Index numbers cover selected "regimens" (or lists of commodities or services) comprising items of—

I.—Food and Groceries,

II.—Housing (Rents of 4 and 5-roomed Houses),

III.—Clothing, and

IV.—Miscellaneous Household Expenditure,

as well as combined regimens of Food, Groceries, and Housing (Groups I. and II.), and "All Items of Household Expenditure" (Groups I. to IV. inclusive)—the "B" and "C" ("All Items") Index Series respectively, of the Commonwealth Statistician.

The several Index series simply measure variations in the aggregate cost of a given regimen of commodities at various intervals of time or as between different towns, and are intended for use as approximate measures of general retail price movements in the commodity classes to which they refer. In this connection it cannot be too definitely emphasised that they do not, and are not, intended to measure variations in the "cost of living." *Vide* Commonwealth Statistician's Labour Report No. 21, Appendix "Wages and Prices," p. 167.

In the series set out in the following pages the Index numbers themselves represent the several "aggregates" expressed as relatives of the weighted average "aggregate cost" of the same regimen in the six capital cities over some specific interval of time, *e.g.*, the five years 1923 to 1927.

To ensure that the series shall be as reliable as possible, the commodities comprising the complete regimen have been selected to conform to the following conditions :—

1. They must be such that they can be clearly and definitely described.
2. They must be capable of standardisation, and mean the same thing at different times and places.
3. They must not be subject to violent or extreme seasonal fluctuations (hence, in general, fresh fruit and vegetables are excluded from the regimen).
4. They must be in common use, and their usage must comprise an appreciable proportion of the total consumption of the commodity group to which they relate, and moreover, remain relatively constant.
5. On the whole, they must be a fair sample of the commodity group which they purport to represent.

FOOD AND GROCERIES.

The following table sets out Index numbers representing variations in the prices of Food and Groceries in each of the five Western Australian towns covered by the Commonwealth Statistician's enquiries. The table also gives weighted averages for the "five towns," and the six capital cities of the Commonwealth. Weighting is on a population basis.

RETAIL PRICE INDEX NUMBERS—continued.

No. 11.—Housing (Rents of Four and Five-roomed Houses)—Five Principal Towns.

Variations in the Rents of four and five-roomed Houses in the five principal Western Australian towns are shown in the following table. The Index numbers are based on returns received from house agents for ordinary unfurnished dwellings, in a good state of repair and with ordinary conveniences, occupying fair situations. "Concession" or "Dole" rentals are definitely not recognised as satisfactory data.

No. 12.—Food, Groceries, and Housing ("B" Series)—Five Principal Towns.

Particulars are given hereunder of the Commonwealth Statistician's "B" Series index numbers for the five principal Western Australian towns. The table simply combines in one series the Food and Groceries and Housing (Rents of 4 and 5-roomed houses) indexes according to the proportions in which these elements enter into the consumption of an average household.

RETAIL PRICE INDEX NUMBERS—continued.

No. 14.—Clothing—Five Principal Towns.

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a Man, Woman, Boy (aged 10½ years), Girl (aged 7 years), and Boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

No. 16.—"All Items" of Household Expenditure ("C" Series)—Five Principal Towns.

This table combines together in one series, the index numbers of Food and Groceries, Housing, Clothing and Miscellaneous Expenditure appearing in the preceding pages. This is the Commonwealth Statistician's "All Items" or "C" Series index of Retail Prices. The "C" Series index numbers were adopted by the Commonwealth Court of Arbitration as the basis for the adjustment of the wages declared in its judgment of the 17th April, 1934. Since its 1937 Basic Wage judgment, the Commonwealth tribunal has been using a special "Court Series" based on the "C" Series (see table No. 18, page 24).

RETAIL PRICE INDEX NUMBERS—continued.

No. 18.—The Commonwealth "Court" Series ("All Items").

This is the Index series issued by the Commonwealth Court of Conciliation and Arbitration, and used by it to vary the "needs" part of the Commonwealth Basic Wage. The series was first adopted by the Court in connection with its 1937 judgment, which provided that the "needs" portion of the basic wage should be the appropriate Index number stated as shillings (to the nearest whole number). The Index series is obtained by multiplying the Commonwealth Statistician's "C" Series Index numbers by 0·081.

Five Principal Towns and Six Capital Cities—Each Series.

Tables Nos. 19 to 23 compare movements among the several Index series in each of the Commonwealth Statistician's "five Western Australian towns," while Tables Nos. 24 and 25 give similar details in respect of the weighted average of these towns and the six capital cities.

Note.—Each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

II.—WAGES.

No. 26.—State Basic Wage.

Under the provisions of the Industrial Arbitration Act, 1912-25, authority was vested in the State Court of Arbitration to declare an annual Basic Wage operative as from the 1st of July each year.

The first decision of the Court took effect on the 1st July, 1926, and prescribed a rate of £4 5s. 0d. for males and £2 5s. 11d. for females throughout the whole of the State.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. 0d. and £2 7s. 0d. respectively, with the exception of certain specified goldfields areas, in respect of which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage of £4 6s. 0d. for males and £2 6s. 5d. for females, in the Metropolitan Area, and rates of £4 5s. 0d. and £2 5s. 11d. respectively for all other parts of the State.

Additional power was given the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the annual declaration, and on the 3rd March, 1931, rates of £3 18s. 0d. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, while all other parts of the State were fixed at £3 17s. 0d. and £2 1s. 8d. respectively.

The annual declaration operative as from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a different wage for agricultural areas, which are taken to be those areas comprised within the official South-West Land Division as gazetted under the Land Act.

Wage levels in all divisions of the State were considerably increased as from the 1st July, 1938, following the most comprehensive inquiry since the original declaration. In the course of the 1938 inquiry, special consideration was given to the factors of National Income and Standard of Nutrition.

The table hereunder shows annual declarations and interim variations since the original decision of 1926 :—

No. 27.—Commonwealth Basic Wage.

While the Commonwealth Conciliation and Arbitration Act, 1904–30, empowers the Court constituted under that authority to prescribe "a minimum rate of wage" it neither defines nor provides for the determination of a specific "basic wage." The latter, however, is identifiable with the minimum wage payable to an adult unskilled labourer.

The history of the Commonwealth basic wage may be conveniently divided into two periods:

(1) Until 1934, rates were based on the "Harvester" judgment delivered by Mr. Justice Higgins in 1907, which fixed 42/- per week for Melbourne as a reasonable amount to meet the needs of "a family of about five."

From 1913 up to the end of 1921 the basic wage was simply a "Harvester" equivalent, rates being fixed by varying the original Harvester wage in accordance with movements in the purchasing power of money as disclosed by the Commonwealth Statistician's "A" Series Index Numbers covering items of food and groceries and rents of "all houses." Up to 1918 the Court in computing "Harvester" equivalents used the index numbers for the previous calendar year, from 1918 to the end of 1921, the figures for the next preceding four quarters were used, and from 1921 onwards the index numbers for the latest quarter available. In that same year the Court began to insert provisions in awards for the automatic adjustment of wages to quarterly movements in the "A" Series index, and a loading—subsequently known as the "Powers 3/-"—was added to the "Harvester equivalent" by Mr. Justice Powers to ensure that over a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until after the onset of the depression. Then in 1931, the Court having satisfied itself that economic conditions were such as to preclude the maintenance of the prevailing level of real wages, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by 10 per cent. as from 1st February of that year.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the "A" Series index numbers had resulted in a decrease of real wages beyond the prescribed percentage. To correct this movement it adopted the use of the "D" Series index.

(2) In judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The "Harvester" standard supplemented by the Powers loading was discarded and a "fresh starting point" selected, which provided that an index number of 1000 in the Commonwealth Statistician's "All Items" (C) Series was to be equivalent to a

wage of 81/- per week. This new standard was based on that established by the New South Wales Board of Trade in 1925. Owing to adverse industrial conditions in South Australia and Tasmania the new rates for Hobart and Adelaide were graduated so as not to come into full operation until 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the first pay period in the months of June, September, December and March. Adjustments were continued on this basis until 1940, since when they have taken effect from the beginning of the second month after the end of each quarter.

The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937, when the Court in fixing a new rate transferred the basis of the adjustment of wages from the "C" Series to a special "Court" Series (see page 24), and at the same time provided for the addition of various differential prosperity loadings to the rate payable under the shillings table as determined by the 1934 judgment. By this method, which is still in operation, the first or "needs" part of the basic wage is varied in accordance with movements in the "Court" prices index, but the loadings (which came into operation by instalments) are fixed amounts. For the six capital cities the prosperity loadings are as follows: Sydney 6/-, Melbourne 6/-, Brisbane 6/-, Perth 4/-, Adelaide 4/-, Hobart 4/-, Six Capitals 5/-.

Commonwealth Basic Wage rates payable in each of the Six Capital Cities since 1931 are set out hereunder:—

No. 31.—Index of Mid-monthly Employment in Factories.

The annual mean employment in factories for the year 1928–29 (19,799) has been taken as base,= 100, in the index series shown below. Figures for months prior to June, 1939, have been computed from particulars obtained in respect of the whole field of factory employment. Index numbers for subsequent months are based on returns collected from informants in a representative " sample " field covering approximately 50 per cent. of the total employees engaged in factories, and are subject to revision. It should be noted that there is a break in the continuity of the series between June and July, 1935, owing to the inclusion from the latter month onwards of certain factories previously not included. To this extent the index numbers to June, 1935, are not strictly comparable with those following.

No. 33.—Juvenile Employment in Industrial Establishments (exclusive of Mines).

Particulars are given below of the number of juvenile factory employees in the various industries. The figures are exclusive of employees engaged in those establishments where less than four persons are employed, and hand power only is used. It should be noted that the figures for 1935 and 1936 refer to average employment over the actual period of operations during the twelve months ended 30th June of each of these years respectively. Figures for the years 1937 to 1939 relate to numbers employed as at 15th June.

EMPLOYMENT—continued.

RELIEF OF UNEMPLOYMENT.

In Western Australia, State assistance for the relief of unemployment is provided either in the form of sustenance or employment on public works.

A.—EMPLOYMENT ON RELIEF WORKS.

All relief work is carried out in accordance with Industrial Awards or Agreements made by, or registered at, the State Court of Arbitration, and the minimum wage is the Basic Wage as declared by the Court from time to time. For married men, the scale of relief provided in respect of each undertaking, is as follows :—

With no children	6 weeks' full-time work in each cycle of 8 weeks.
With 1 child	7 weeks' full-time work in each cycle of 9 weeks.
With 2 children	7 weeks' full-time work in each cycle of 8 weeks.
With 3 or more children	Full-time.

Single men are employed part-time on a basis that enables them to earn at the rate of 33s. 2d. per week.

No. 35.—Relief Workers, 1936 to 1940.

Particulars of the numbers of men engaged as "relief workers" on public and certain local government works as at the end of each financial year from 1935–36 to 1939–40 are given below. It should be noted that the figures relate to men engaged by the various employing departments through the agency of the Department of Employment, which administers the provision of unemployment relief. Thus while the men are described as "relief workers," many of them are employed on works other than those undertaken purely for the relief of unemployment.

STATISTICAL VIEW OF THE PROGRESS OF WESTERN AUSTRALIA, 1829 TO 1938-39.

Note.—Prior to the year 1837 no Blue Books were issued, and figures relative to arrivals and departures, shipping, imports and exports have been taken either from the reports of the Harbour Master at Fremantle or from Perth newspapers of the period. From 1838 to 1859, inclusive, migration figures show only the excess of arrivals over departures or *vice versa*.
